

Policy Number: 3200
Policy Title: Diversion First
Adopted: TBD

Purpose

A Diversion-Oriented System of Care, known as *Diversion First*, aims to reduce the number of people with mental illness, substance use disorders and intellectual and developmental disabilities in local jails by diverting offenders involved in low level crimes who are experiencing mental health crises to treatment instead of incarceration.

Policy

It is the policy of the CSB to collaborate with participating organizations to provide assessment, consultation and resources, subject to availability, to:

1. Collaborate with law enforcement, the judicial system, first responders, other community agencies, and citizens to redirect individuals from our judicial system into our health care system.
2. Support ongoing Crisis Intervention Team (CIT) training for local law enforcement personnel.
3. Develop and collaborate on Diversion First initiatives through Memorandums of Understandings and service delivery strategies with local law enforcement agencies.
4. Provide Mental Health First Aid Training to community stakeholders groups and the general population.
5. Collaborate on transfer of custody, data collection, and assessment and treatment services.

Services provided by the CSB that support the Diversion First efforts will be designed to comply with policies and procedures required by federal and state oversight agencies, county, and interagency agreements.
